Greenguard certified, manufactured in ADI's ISO 9001 and ISO 14001 compliant facility.
Let your imagination create the ideal combination!

The Beam Seating series was designed to accept a broad range of already existing ADI seats and arms. This flexibility makes it easy to custom build spaces with a wide selection of styles. From the modern look of polished aluminum on the Voila to the classic wood shell of the Clover or the knit back on the Tact - the beam seating has you covered.
The beam modules may be assembled in line, angled or bolted to the floor. Corner, regular or cantilever tables may be added to the ensemble. Arms can be installed in between the seats/tables and at the ends, as needed. Beam Seating models come with 4 leg options, 9 powder coat paint finishes and 4 laminate table tops.
Combined with infinite fabric offerings and a variety of seat and back options, creative combinations are only limited by your imagination.

Tilting seats, ideal in tight areas.
Beams and Legs

Dimensions
Beam Seating modules are available in 5 different sizes, made to accommodate all seats, tables, arms and legs offered in this series. Two or three seater beams, with a respective capacity of 1,000 lbs and 1,500 lbs are also available.
